

5.1 Similar Triangles

Objective: Students will be able to find the missing side lengths and angles in similar triangles.

Properties of Similar Triangles

$\triangle ROB \sim \triangle FAT$

Similar to

If triangles are similar, we know two things:

1) _____

2) _____

_____	=	_____
_____	=	_____
_____	=	_____

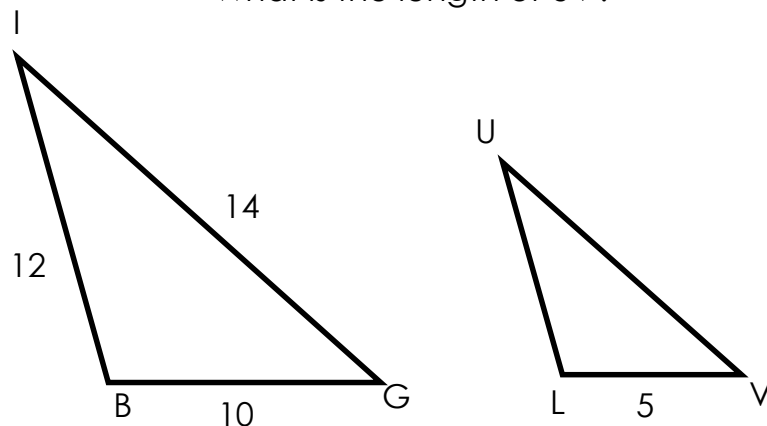

$\triangle CAT \sim \triangle DOG$ state which angles are congruent and the ratio of the corresponding sides

\angle _____	\cong	\angle _____
\angle _____	\cong	\angle _____
\angle _____	\cong	\angle _____

_____	=	_____
_____	=	_____
_____	=	_____

Triangle BIG is similar to triangle LUV.
 What is the length of UV?

Step 1: Set Up Ratio's
 Step 2: Cross Multiply
 Step 3: Solve

$$\underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$\triangle ABC \sim \triangle DEF$. Find the length of CB if AC = 12, DF = 9, and FE = 14.

Step 1: Set Up Ratio's
 Step 2: Cross Multiply
 Step 3: Solve

$$\underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

If $\overline{VU} = 4$, $\overline{VW} = 6$, $\overline{WU} = 9$, and $\overline{XZ} = 15$, what is the length of \overline{XY} ?

Step 1: Set Up Ratio's
 Step 2: Cross Multiply
 Step 3: Solve

$$\underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

Independent Practice

What are the two properties of similar triangle? (Look on your notes!)

1) _____ 2) _____

$\triangle RAT \sim \triangle FCE$. Find the length of \overline{AR} .

$\triangle ABC \sim \triangle XYZ$. Find the length of XZ.

$\triangle ABC \sim \triangle DFE$. Find the length of FE?

If $\triangle MNQ \sim \triangle ONP$ and $MN = 12$, $NP = 15$, $QN = 20$, what is the length of ON?

Triangle ABC is similar to triangle MNP ($\triangle ABC \sim \triangle MNP$).

Find the length of \overline{NM} .

In the diagram below, $\triangle MNP \sim \triangle RST$.

Based on the dimensions in the diagram, what is the length of \overline{MN} ?

In the accompanying diagram, $\triangle QRS$ is similar to $\triangle LMN$, $RQ = 30$, $QS = 21$, $SR = 27$, and $LN = 7$.
What is the length of \overline{ML} ?

Look at the figure below.

Find the length of \overline{TE} .

Find the perimeter of $\triangle DEF$ if $\triangle ABC \sim \triangle DEF$.

A triangle has sides whose lengths are 5, 12, and 13. A similar triangle could have sides with lengths of

- 1) 3, 4, and 5
- 2) 6, 8, and 10
- 3) 7, 24, and 25
- 4) 10, 24, and 26

Explain why you picked your answer
